

Elipse International Ex Solutions Ltd.

Mining & Exploration, Trading & Logistics

Commodity Trading & Exporting

We are an Indigenous mining company registered under the Nigerian law as a Mining and Exploration, Mineral Processing and Export company. The company was founded, operated and managed in 2008 under a business name Elipse International Solutions but was later incorporated into law in April 17, 2013. Elipse International Exploration Solutions Limited (EIES) is also a member of the *ELIPSE GROUP*. The company is set up with an uncommon vision and managed by experienced innovative executive with extensive knowledge in the mining and metallurgical industry.

Elipse International continues to play a key role in our market and aggressively pursue joint partnerships and ventures with overseas partners which are the fundamental area of our business success.

Our principals share a common set of values, marked by a commitment to the highest standards of integrity and a desire to build close and lasting relationships with its management team, employees and its business partners. We have emerged as an important player in the way companies conduct the purchase of mineral commodities and their various trade options.

Through utilization of our professional knowledge as well as our expertise in the mining operations, we aimed to help customers streamline and enhance the opportunity to reduce their cost of raw materials. The combination of outstanding product and expert advice is a winning fusion which will enlarger substantial profit to our customers' bottom lines.

By combining our years of experience across the full spectrum of industries, our mining solutions offer innovation, initiative, experience and technical ability that most companies could not afford to nurture and develop independently. Securing continued client's confidence, successful production scheduling and proper operational management cohesively in one platform ensures our clients gain in supply, resources and output. Our objective is to be first class global trader of various commodities performing diverse transaction daily in an honest, secure and integral way.

Elipse International's list of metallic product includes the following minerals:

- › Copper Ore
- › Manganese Ore
- › Lead Ore
- › Zinc Ore
- › Chromate Ore
- › Antimony Ore

Our commitment to integrity is a cornerstone of our past, present and future success. This drives our dedication to uphold ourselves to the highest standards of business conduct and ethiques.

Our objective is to be first class Nigerian supplier of mineral commodities performing diverse transaction daily in an honest, secure and integral way. Elipse International assist companies identify their greatest sourcing value opportunities and introduce concrete commodity acquisition strategies. These are what define the methodology we utilize to meet our performance goals and customer service level we build.

Logistics Support Services

While we are primarily focused on mining exploration and production operations of minerals and other dry bulk products, Elipse International also arranges for the bundling and transport of the product to various import countries for sale in bulk, including trucks, railcars, river barges and ocean-going vessels or through our long-term contractual agreements with third-party logistics companies.

In addition, Elipse International specializes in conducting global supply chain assessments, demonstrating performance analysis and proposing cost saving solutions for the mineral commodity trading industries. We analyze our client's logistical needs in connection with their business structure and desired profitability.

In today's fast paced business environment an inefficient supply chain can cost a tremendous amount of money every day and requires the effective appraisal of existing process structures to determine input and output.

As well, Elipse International is doing more than just trading minerals. We mine the best products with high grade quality our clients demand. Along with our extensive knowledge of the mining industry, market insight, logistics support and network of traders and mandates, we can be an elegant supplier to all prospective clients.

Our experience, dedicated people, our drive to become the standard of excellence in customer services will enables us to offer the best in the market we serve.
